---

BATTERY INSTALLATION

Ensure batteries are inserted with the positive (+) end pointing to the head.

SUPPORTED BATTERIES

• 3 x 18650 (Please ensure that all the 18650 batteries used in the SR52 have a button top configuration or they will not make contact with terminals in the battery compartment.)
• 6 x CR123A

TWIST TO REMOVE

OR

WARNING:

• Do not use unsupported batteries with this flashlight.
• Cannot use flat 18650 batteries.
• Do not mix rechargeable and non-rechargeable batteries.
• Use caution on high outputs or long runtimes as flashlight may get hot.
• Do not charge the light when use the non-rechargeable batteries.
• Do not mix batteries of different types/brands.

HOW TO OPERATE

ON/OFF: Click the side switch to turn flashlight on or off, the light has mode memory, every restart, the light returns to your previous level.

CHANGE BRIGHTNESS LEVEL (FIG A)

Press and hold the side switch when the light is on. The brightness levels will cycle up then repeats low – medium – high until level is selected. Release the switch when on the desired brightness level to select it.

STROBE (FIG A): Double-clicking the side switch will activate the strobe mode, holding down the switch for 1 second will return to constant on.

LOCK OUT: (FIG B) Press and hold the side switch for approximately two seconds then the light is off. The lock out mode will prevent the side switch turning on to prevent accidental activation.
UNLOCK: (FIG B) Press and hold the side switch for approximately one second when the light is locked. The light will automatically be in memory mode.

CHARGING THE FLASHLIGHT(FIG C)

Push the cover above USB socket aside, then make connection between the flashlight and PC's USB port or USB power adapter through micro-usb cable. Fully charging three depleted 18650 batteries will takes approximately 10 hours, while the charging is complete, the indicator will turn green from red.

LOW BATTERY WARNING

When the battery voltage gets lower, the indicator near the USB port start to blink once in one minute, if the indictor become red, it meaning the battery energy is coming to use up.
